REASONS FOR ALLOWANCE

1. Claims 11-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: Gendreau (US 2001/0034608) discloses the use of a package sizer system where a package travels along a conveyor and the length is measured by the time and speed of the package however fails to disclose the use of optical sensors in the z and y direction to measure width and height and also fails to disclose the sizing is determined by the reduction in the ambient light. Dlugos (5,878,379) discloses the use of optical sensors in the x, y and z direction, however discloses the optical sensors are photo sensors which detects the presence of reflected light off a package to determine the size. Therefore a billing system with a microprocessor which is configured to correlate package size to determine a transportation charge for a measured package, where the package is sized using a package sizer with non-contact optical sensors being positioned in the z and y direction and the width being determined by the package blocking one or more sensors to create a reduction in the amount of ambient light reaching the sensor and the sensor sensing the reduction of ambient light, and the use of a means for measuring the length of the package comprising an apparatus to measure a speed of the package and length of time the package takes to pass the optical sensors, is not anticipated nor rendered obvious over the prior art of record..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
